It's like having a new car every day.

Arnold Clark Protect professionally applied automotive paint and interior protection products offer real value to both new and used car customers, keeping your car looking as good as it did the day you bought it.

### Protects your car's exterior

All Arnold Clark Protect products have been developed to withstand the harshest environmental and climatic conditions and our paint sealant is one of the most technologically advanced treatments available. When your car's treated with Arnold Clark Protect:

- Paintwork is coated with a high-tech polymer sealant that bonds to the paint and forms a tough protective barrier with a high-gloss finish.
- This protects your paintwork from the worst that the elements can do and there's no need to wax or polish it – all you have to do is wash the car.
- Once applied, it's there to stay for a minimum of 3 years, and that's our guarantee.
- To help keep your car in pristine condition, certain packs include a selection of aftercare products.

### Why use Arnold Clark Protect?

#### Unprotected paint

If left unprotected, paint deterioration begins from day one. Pollution, acid rain and ultraviolet rays will begin to oxidise the paint.

#### Unprotected interior

The unprotected fibres in your new car can soak up liquids and dirt, leading to unsightly stains and marks.

#### Unprotected after 1 year

The paint has started to oxidise and the grime in the low points can only be cleaned by a cutting polish, which removes a layer of paint.

#### Unprotected after 1 year

Dirt and spilled liquids have absorbed into the fibres, the stains and marks that can devalue your car.

#### Protected after 3 years

Our high-gloss polymer sealant protects the paint from day one. There has been no oxidation, no accumulation of grime and no reduction in paint thickness.

#### Protected after 3 years

Our unique resin-based formula has protected and sealed the fibres against staining so your car still looks as good as new.

### Preserves your car's interior

Arnold Clark Protect fabric and carpet protection coats each fibre with a resin-based formula that won't wash out. For cars with leather seats, we also offer an exclusive package specifically designed for the cleaning and protection of your leather without damaging its supple and lustrous feel – Arnold Clark Protect leather protection.

- These professionally applied products prevent spills of coffee, tea, milk, soft drinks, juices, water and other similar liquids from permanently staining your fabrics, carpets or leather.
- The dirt can be either vacuumed or wiped off with a gentle cleaning solution.
- The invisible barrier helps reduce friction between upholstery and carpet fibres, prolonging their life and allowing them to retain their natural texture and appearance.
- Once applied, it's there to stay for a minimum of 3 years – your car retains the same superb look it had when you bought it, so when you come to sell it, you can be assured its value has been preserved.
