

***Arnold Clark***

# Protect

From £275

It's like having  
a **new car**  
every day.

### **What is Arnold Clark Protect?**

Our professionally applied paint and interior protection products keep your car looking as good as the day you bought it.

At Arnold Clark we guarantee to protect your car from the vagaries of everyday life; both inside and out, with full protection for at least five years against damaging environmental pollutants and accidental spills. So your car will continue to look fantastic, and its value will be carefully preserved.

**Protect your car on the outside.**

The technologically advanced paint sealant is applied by our technicians, and forms a tough polymer barrier with a sleek high gloss finish. Acid rain, road salt, UV rays and other forms of atmospheric damage are taken care of for a minimum of five years.

There's no longer any need to wax or polish, simply wash your car to keep it in pristine condition. We'll even include a selection of aftercare products for the onward journey.

### **Care for your car on the inside.**

When your car's interior is protected, worries about spilled drinks, food or even mud simply evaporate into thin air. Our qualified technicians coat each fibre of your car's interior materials with a resin-based formula that acts as a barrier to stains.

Any dirt can be instantly removed with a gentle cleaning solution, keeping it as good as new. Available for both fabric and leather interiors, you can be sure Arnold Clark Protect lives up to its name, caring for your car for minimum of five years.

## Why use Arnold Clark Protect?

### Outside

If left unprotected, paint deterioration begins from day one. Pollution, acid rain and ultraviolet rays will begin to oxidise the paint.

### Inside

The unprotected fibres in your new car can soak up liquids and dirt, leading to unsightly stains and marks.

### Unprotected after 1 year

The paint has started to oxidise and the grime in the low points can only be cleaned by a cutting polish, which removes a layer of paint.

### Unprotected after 1 year

Dirt and spilled liquids have absorbed into the fibres, the stains and marks that can devalue your car.

### Protected after 5 years

Our high-gloss polymer sealant protects the paint from day one. There has been no oxidation, no accumulation of grime and no reduction in paint thickness.

### Protected after 5 years

Our unique resin-based formula has protected and sealed the fibres against staining so your car still looks as good as new.

## Arnold Clark Protect
